

Central Valley Indian Health Clinics are currently canceling patients for routine care, but will remain open for urgent care needs. Doctors will be available to speak with patients regarding their medical concerns and medication refills over the phone.

We are open during normal business hours to see urgent care on a walk in basis. For everyone's safety, please call us before you come in.

If you have a fever, cough, sore throat, have traveled recently or been exposed to someone with the Coronavirus, please call us at 559-862-2746.

At Central Valley Indian Health, Inc., the safety of our patients, and our staff is of our utmost concern. We are closely monitoring the current situation and are following guidance from public health officials and government agencies.

We will continue to update you as operations change. Thank you for your patience.
